Nesting boxes thoughtfully designed for their inhabitants!

THE GROUND BIRD FEEDER

FILLING

To fill the Ground Bird Feeder, simply remove the lid, and fill the hopper with peanuts or other coarse bird feed such as sunflower seeds. The large hopper is designed to take a few days for the birds to empty.

SITING

Simply place the feeder on the ground. The birds will feed more readily if it is placed where they have an uninterrupted view of any animals or other birds that might approach the feeder, so it is worth placing it on flat ground (eg on a patio or on short grass) with an open space all round.

MANAGEMENT

From time to time, check that the feed has not become waterlogged or clogged up. If necessary, clean out the feed and replace with fresh.
