Nesting boxes thoughtfully designed for their inhabitants!

THE SQUIRREL FEEDER

SITING

Fit the feeder to a wall, tree or fence using a screws or nails. As with other feeders, it is expected that you will site it where you have a good view of the squirrels feeding.

FILLING

To fill the Squirrel Feeder, simply open the roof, and fill it with peanuts or other feed. This can be done in situ.

MANAGEMENT

This feeder requires the squirrels to open the roof to help themselves to the food inside. Initially, they will be able to sit on the platform, and will see their food, but they have to learn how to get it out.

From time to time, check that the front window is clean and that food has not become waterlogged or clogged up at the bottom of the feeder. If necessary, clean out the feed and replace with fresh.
